

1ST ANNUAL SYSTEMS BIOLOGY OF INFECTIOUS DISEASES WORKSHOP

This two-and-a-half day workshop will focus on viral systems biology and the application of phylogenetic methods on the study of viruses. Bringing together leading researchers in phylogenetics and bioinformatics, particular focus will be placed on genomics and phylogenetic methods of analyzing virus evolution. In addition, participants will hear from expert science communicators about the importance of effectively conveying scientific findings to the public.

PRESENTERS

JENNIFER GARDY
Associate Professor
University of British Columbia

ED YONG
Journalist
The Atlantic

ANDREW RAMBAUT
Professor
University of Edinburgh

NICK LOMAN
Professor
University of Birmingham

TAMI LIEBERMAN
Assistant Professor
Massachusetts Institute of Technology

SIDNEY BELL
Graduate Student
University of Washington

PHILIPPE LEMEY
Group Leader
KU Leuven

NIDIA TROVAO
Postdoctoral Researcher
NIH Fogarty International Center

MICHAEL WOROBAY
Professor
University of Arizona

ORGANIZERS

KRISTIAN ANDERSEN
Associate Professor
Scripps Research

MARC SUCHARD
Professor
University of California, Los Angeles

February 20-22, 2019 | Scripps Research, La Jolla, CA
